

Make Money as an Urban Farmer!

A workshop presented by
Sustainable Commercial Urban Farm Incubator (SCUFI) Program

February 19-20, 2011, 8am – 6pm, Berkeley, California

Lead Trainer: Curtis Stone, of Green City Acres, an urban Small Plot Intensive (SPIN) farm in Kelowna, BC Canada.

Curtis will share with you how he used the SPIN-Farming® system to build a multi-lot 1/2 acre urban farm that in its six month 2010 first season grossed \$20,000.

Before starting his SPIN farm, Curtis had little experience gardening or farming. He'll show you how SPIN farming can be implemented effectively and inexpensively ... even in a harsh climate and short growing season like Kelowna!

If Curtis can do it, so can you!

Saturday: David Brower Center, Berkeley, CA, Indoor lectures and demonstrations
Sunday: East Bay urban farm (location TBA), Outdoor hands-on field exercises

Workshop trainers will help you ...

- Learn about SPIN, and how the SCUFI program can assist you with training, financing, and securing land to launch your own profitable sustainable urban farm business, even if you have no previous farming or gardening experience.
- Meet people at the forefront of the growing sustainable commercial urban farm field, share ideas, gain knowledge, pool resources, plant seeds and form alliances to build your own high-income urban farm business.
